

## HAND STRETCH

### SurewrapMax

Surewrapmax stretch film is a state-of-the-art film ideal for all your wrapping solutions.

Features include:

- High performance film that uses state of the art resin technology
- Cost effective alternative to conventional cast/blown film
- Is easily hand-stretched with 30-50% tension at stretching point
- Weighs less than conventional film rolls and is less tiring to apply
- Uses up to 20% less film per pallet wrapped and reduces environmental impact
- Our Surewrapmax stretch film is available in 12um, 15um and 20um thicknesses.

### Surewrap

Surewrap stretch film demonstrates high-quality and is a cost-effective option for all your wrapping needs.

Features include:

- High clarity
- Quiet unwind
- Water and dust resistant
- Suitable for general purpose applications
- Cost effective – Economical
- Surewrap stretch film is available in 20um, 23um and 25um thicknesses.
- Surewrap stretch film is also available in 20um black, offering product security.

### Surewrap Bundling

Bundling film features include:

- High clarity
- Quiet unwind
- Water and dust resistant

# MACHINE STRETCH

## Surewrap Premium

Surewrap Premium stretch film is the next generation stretch film, and it is just 33 layers "thin". The multiple layers may sound too thick for ones liking, but because of it's nano nature, it's incredibly "thin" yet tougher in so many ways compared to the many standard films in the market. It has excellent puncture and tearing resistance similar to the likes of "plywood effect", where safety of loads are never compromised. With Surewrap Premium, less film is needed to secure a load properly and the packaging costs are significantly lowered.

- Designed to perform at higher wrapping speeds
- Stretches further than 400%, which is far superior to traditional cast stretch films
- Cost savings and waste reduction due to its high stretch and thin gauge
- It has higher Machine Direction (MD) and Transverse Direction (TD) tear resistance compared to normal cast stretch films, for great load stability and safety
- Surewrap Premium is available in 12um, 15um, 17um and 20um thickness

## Surewrap Xecure

Surewrap Xecure stretch film is an incredible secure load solution. Perfectly designed to adapt to most of the new and old arm and turn-table wrappers currently in the market able to stretch from 150% - 200%.

- Cost saving and high holding force with thinner gauge
- Quality is consistent and high traceability
- High tear resistance
- Surewrap Xecure is available in 14um and 17um thickness

## SurewrapMax

Surewrapmax machine stretch film is a state-of-the-art film ideal for all your wrapping solutions.

Features include:

- High performance film that uses state of the art resin technology
- Cost effective alternative to conventional cast/blown film
- Uses up to 20% less film per pallet wrapped and reduces environmental impact
- Low tension at stretching point 30-50%
- Longer roll lengths on each roll
- Offers the same performance as higher gauge films at a significantly lower cost

- Film does not neck down when stretched so your pallets are wrapped faster
- Great puncture strength means sharp edges wont ruin your wrap
- Surewrapmax machine stretch film is available in 12um, 15um and 20um thicknesses.
- Surewrapmax machine stretch film is also available in 15um black, offering product security.
